36

Summary of January - December 2022

Gratitude Note

37

To Our Donors, Sponsors, Volunteers, Friends and Family

ACCESS IS CRUCIAL

Access to therapy services is crucial for people with physical disabilities (PWDs). Most families find the cost per individual for therapy sessions too expensive and are unable to afford these long-term costs. The cost per session is \$10.00 USD and those challenged with a physical disability require at least two sessions a week, for at least a year.

COMMITMENT TO CHANGE

YPK Bali is on a mission to change this. Access to quality therapeutic services and other services that aim to increase the quality of life of people with physical disabilities should be available anywhere and at any time. Therefore, it must start with the family. But these changes would not be possible if YPK worked on its mission alone. With the support from our donors, partners, sponsors, and volunteers, together we can create a change that we can work towards together.

Our Vision

To maximise the independence and improve the quality of life of people with physical disabilities.

Our Mission

1

To support all efforts of restoring the social functions of people with disabilities through caring, affordable, and professional rehabilitation services.

2

To support people with disabilities to develop their potential through the physical and social rehabilitation program.

3

To empower people with disabilities, families, and communities, through the development of creative and innovative programs as a preventive effort.

ABOUT YPK BALI

Who We Are

YPK Bali was founded in 2001 and is a not-for-profit organisation. It aims to assist people with a disability to be independent, improve their health, optimise their abilities, and help them recognise their importance in society.

What We Do

YPK Bali provides integrated programs for people with physical disabilities to improve their health and independence through physical rehabilitation programs, informal education, mobile clinics, and a hearing loss prevention program called BaliRungu.

Where We Work

YPK Bali is located at the Annika Linden Centre in Tophati, Bali, which is a new rehabilitation facility. It is custom-built to cater for local non-profit organisations, which includes YPK and other health and disability organisations. YPK Bali also reaches out to people with physical disabilities throughout Bali through our outreach program.

CHAIRPERSON LETTER

We feel honored to disclose the 2022 Annual Report to readers and I am hoping everyone is staying safe and healthy.

2022 was another challenging year for YPK Bali. It has challenged us to develop different solutions and constantly try to find creative and improved ways of delivering our services. Yet, with our strong commitment and dedication, we were able to continue the services throughout the year. We are committed to improving our performance further and concerted transformation of our foundation with a view to building a better service. I am very pleased and proud of all the Board members and staff for their work and contributions.

All of the great work achieved through out 2022 was only possible because of you, all YPK's partners (private sectors, institutional, and governments), funders (national and international), volunteers, who faithfully worked alongside YPK in our activities. Your love and support that you gave has changed many lives of vulnerable people so that they could have a better future. It is really our exceeding joy and happiness when we see those we serve show promising changes. I sincerely hope that this support and cooperation will continue in the future so that more people in need can be helped by our services.

Thank you very much for lighting a glimpse of hope to bless this humanitarian work.

Elsye Suryawan
Chairperson

By any measure, 2022 was a year of milestones, and the first year in my leadership role at YPK as Director. Indeed, as I reflect on my 13+ years working in YPK, I have learnt and experienced volumes, where I have gained the necessary skills and experience to effectively lead the staff and operations of YPK. I am truly humbled to follow in the footsteps of my predecessor and to advance into my current position as Director.

Director's Note

YPK has with determination and consistency, promoted and provided equal access to health and educational services for people with physical disabilities. This includes access which is our top priority. YPK is now launching and expanding its current services which are - The Putera Desa (Community-based disability centre), an initiative to promote the accessible therapy program at village level, and also the Rumah Bantu Dengar (community hearing centre) which is a project that aims to promote quality health services at a community level. We believe these initiatives are well needed within the communities and equally appreciated by the people in need of these services.

Throughout 2022, YPK has supported 312 people with physical disabilities. This has included more than 193 children under the age of 16. Furthermore, our other very successful initiative, our hearing impairment program has reached and served 8,005 people across Bali. This is where we provide hearing tests and where needed, have provided hearing aids.

However, 2022 also brought our YPK family and friends deep sadness. Our founder and previous director passed away in September 2022. Mr. Purnawan Budisetia was truly an inspirational person to me and to all who knew him. He was not only one of the founders of this amazing organisation, but was my mentor who helped shape the person I am today. Pak Pur worked tirelessly and had unfailing commitment and dedication towards assisting those with a physical disability. Indeed, he was a role model for me and for everyone at YPK. His spirit will always live in our hearts and in the organisation.

As we look ahead, we will continue to grow by scaling up our impact and expanding our partnership. We know that our commitment to creating positive changes continues to require team-work, and your support with your time and resources are valuable.

YPK's future and life changing stories would not be possible without the extraordinary staff, the volunteers, board members, supporters and our community partners.

I wish to sincerely thank each and everyone for your time, commitment, dedication, and support over the years. I am so proud to be in this organisation and to share the journey of assisting our clients with disabilities to reach their full potential. Again, I extend my appreciation for your support and particularly during our year of transitions. May we continue to strengthen YPK together and to provide quality services and programs to our clients.

Wahyuni Andhitya
Director of YPK Bali

EXECUTIVE SUMMARY

YPK Bali continued its leadership by appointing a new director, namely Wahyuni Andhitya. This leadership change went through a series of succession processes, beginning in 2015. Ensuring the organization has leaders who understand the organization's programs and values, and maintain the vision and mission, is very important for YPK's sustainability. This transition process was successfully carried out with the support of YPK's Board and our main partner, the Inspirasia Foundation and Annika Linden Centre.

As our current situation begins returning to normal, after the hard times of the pandemic, YPK is using the momentum to support the scaling up of its impact. In 2022, through cross-sector collaboration, we successfully launched three community-based centers. We strengthened community empowerment to ensure the sustainability of this launched project. As many as 25 local volunteers have been trained to provide assistance to persons with disabilities in the community.

YPK also continues to deliver its services in both face-to-face and online formats. Despite the challenges of the current online system, we are including time allocation from parents to assist in the exercises because they are all busy getting back to work, but the flexibility of this online system has assured that people with physical disabilities could continue to maintain their functions and fitness levels. In fact, YPK has planned to strengthen this online system to a better service model so the wider community can access our resources and benefit from our services.

PURNAWAN BUDISETIA

FOUNDER OF YPK BALI
7.12.1960 – 27.09.2022

An inspirational man who gave his life to making a difference and creating long-lasting impact for people with disability and the community. He was a special and humble man and a visionary. Always ready to help others, he founded YPK, an exceptional organisation that continues to change so many lives.

Pak Purnawan leaves a legacy behind, one we are all proud of. A big part of the Inspirasia Family, he will be greatly missed.

THE INSPIRASIA TEAM

**ANNIKA
LINDEN
CENTRE**

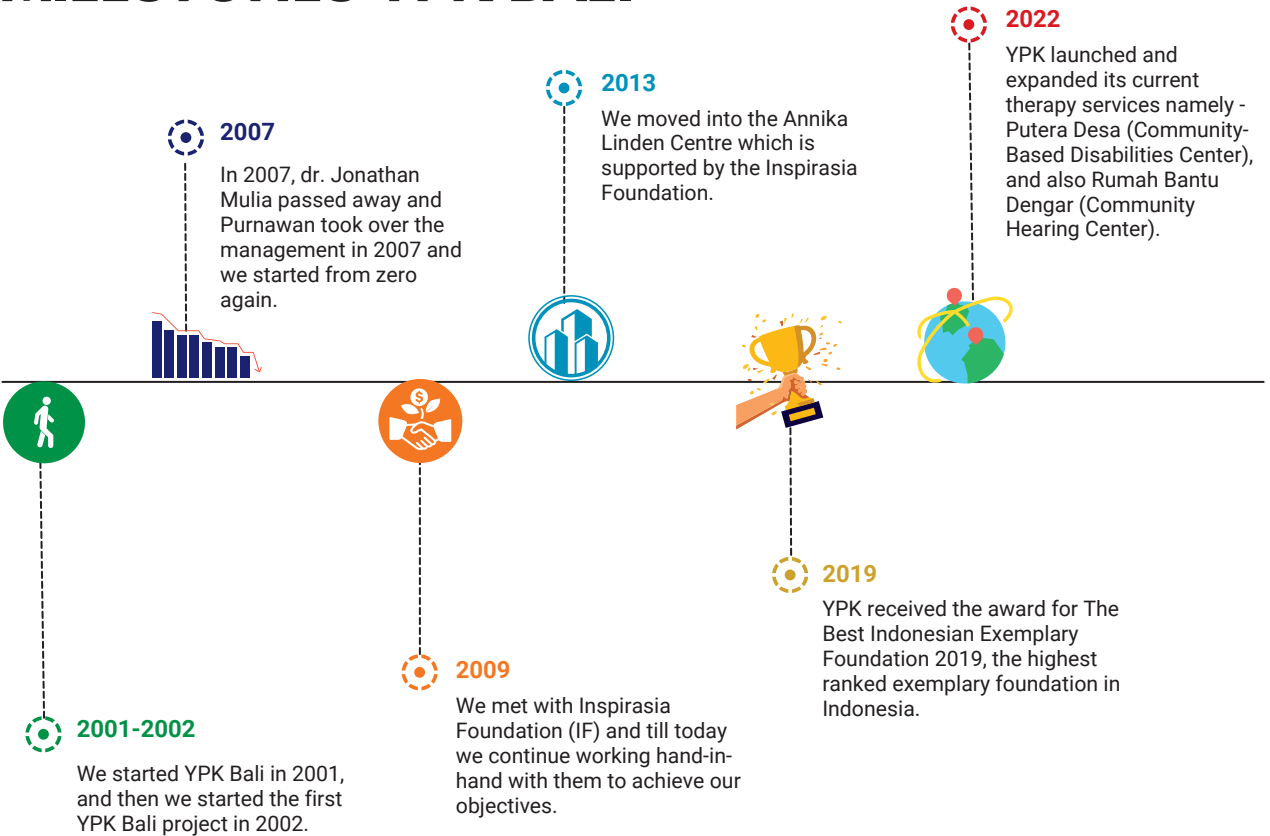

YPK BALI
Rehabilitation for Physically Disabled

Inspirasia
FOUNDATION

The deep commitment to promoting equity among the community was at the heart of Pak Purnawan's aspiration to provide comprehensive and tailored support to people living with a physical disability. Today, YPK Bali has aided over 75,000 people. Transforming and enhancing the lives of individuals is YPK's motivation and lifelong objective.

MILESTONES YPK BALI

Wangga, a 3 year old boy from Denpasar, was one of our clients who joined YPK during the pandemic back in 2021. Unfortunately, this story is not only about him, but also about his father, Mr. Wahyu. Mr. Wahyu had a stroke after he lost his job at a restaurant due to the pandemic. His situation became more challenging as his little boy, named Wangga, was diagnosed with autism and hydrocephalus.

Both father and son came to YPK for therapy assistance. YPK's physiotherapists introduced local-resource-based therapeutic equipment to Mr. Wahyu and his wife. The idea was to support the family to be able to continue doing all exercises at home using materials they already had. Mr. Wahyu was enthusiastic to learn and gain help for his son, Wangga.

During our home visit, we proudly witnessed Wangga walking with a homemade walker made out of PVC pipe. Additional good news was shared by Mr. Wahyu's wife. She informed us that Mr. Wahyu was now able to ride a motor bike. He continues to practice working on getting his independence back and supporting his family. The positive family bonding and cooperation has truly brought joy to the Mr. Wahyu's entire family as well as the YPK Bali Family.

FAMILY TEAM WORK

REHABILITATION

The Rehabilitation Center offers clients a multidisciplinary therapy approach, incorporating physiotherapy and occupational therapy. All the support has been delivered in collaboration with each child's parents. From the beginning, each child receives an initial assessment at YPK. Then our team directly starts to work closely with both father and mother of the child. Through this collaboration, YPK staff will be helping the parents to understand the current condition of their child and the challenges and possible solutions. The parents will learn about maximizing local resources to support a therapy program and how they can effectively treat their child. This will help them in providing continued support both at home and in their communities.

SERVICES

218 people with physical disabilities accessed our services every month.

PHYSIOTHERAPY

Teaming up with 6 physiotherapists, this program successfully delivered a total of 16,904 therapy sessions for 218 people with physical disabilities. Ninety-four out of 218 were new clients, who joined the rehabilitation program in 2022.

FAMILY SUPPORT

YPK team has continued to work closely with 218 parents and/or family members to provide support for people with physical disabilities.

HOME VISIT

21 people with physical disabilities were provided with home visit service to support their daily activities and independence.

EARLY DETECTION & INTERVENTION

Early detection and intervention of a disability were provided to 730 babies in collaboration with 5 Public Health Centres around Denpasar City.

INTEGRATED REHABILITATION

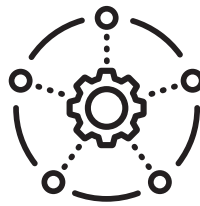

GET TO KNOW OUR LIFE CHANGING SERVICES

FOCUS ON CHILDREN

73% of our beneficiaries are children with physical disabilities.

INTEGRATED APPROACH

The implementation of all activities has continued to be done through a combination of face-to-face services and remote services.

FAMILY SUPPORT

YPK empowers families to support their family members with a disability at home to achieve sustainable rehabilitation.

SAFE & COMFORT

We strictly adhere to health protocols and child protection policy.

SUSTAINABLE CHANGES

Home Exercises

203 people able to do home exercises safely.

Handbook

156 people feel more confident to do home exercises with YPK's exercise booklet.

Telerehabilitation

143 families feel helped by the online therapy services.

Families Can Focus on Work

41 people - because of the increased independence of families with disabilities.

Happy Life

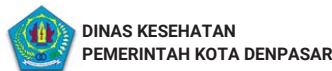

88 people with disabilities became more vibrant about their life.

Acceptance

108 people are no longer ashamed to have a family member with disability

PARTNERS

REHAB IMPACT

113

People with physical disabilities are more enthusiastic to participate in various positive activities and are willing to try new and fun things.

194

People with physical disabilities feel their body functions have improved and they are more confident and enthusiastic about exercising.

188

People with physical disabilities have improved their hand function so much so that 74 of them are able to eat and drink on their own; 117 are able to dress independently; and 59 are able to carry out other daily activities independently.

168

Families are able to make therapeutic tools using materials that are found around them to support the exercise and independence of family members with disabilities.

123

Families can carry out good disability management at home so that people with physical disabilities can avoid a worse condition or second disability.

I WON'T GIVE UP

It was May 2022 when Mr. Ketut came to YPK for the first time, for help. At that time, he was sitting in a standard type of wheelchair because of his hernia nucleus pulposus. He had lost his job as a driver but he never lost his spirit to want to regain his independence. All the therapeutic plans had been carried out, both at our rehabilitation center and at his house in Gianyar. Then, just in three months, Mr. Ketut was able to stand up on his own with support from a walker. He started to walk and continued to do all his required home exercises.

In September of 2022, Mr. Ketut took his first evaluation process with YPK's physiotherapist. He surprised our therapists and his family by showing that he now was able to use a tripod cane to walk around. Currently, Mr. Ketut comes to YPK on his own and does not require family support. He feels relieved as his family can now get back to their work and that he is no longer an extra burden. His goals are to develop better walking patterns and strengthen his lower limbs. His spirit and optimism are inspirational to us all.

A healthcare worker wearing a blue surgical cap and a green face mask is examining a child's arm. The child is wearing a blue and white patterned shirt. A parent, Mrs. Grace, is sitting next to the child, looking on. The scene is set in a community health program. In the background, other people are visible, including a woman in a blue patterned shirt and a man in a dark blue shirt. A sign on the table reads "CEK".

TESTIMONIAL

The early detection and intervention program was very beneficial for our community at Kelurahan Panjer because it supported our health program. There was great enthusiasm coming from the parents because such program had never been conducted or implemented before. The parents now could be made aware about the potential red-flags on their child's growth and development. They are happy that they are being provided access to examinations and access to information so that their children, who need extra support in stimulating growth, development and therapy support can get it at a very early stage. Thank you YPK.

Mrs. Grace (Ibu Lurah Panjer)

EDUCATION

The Education Program provides specialized modified education for children with physical disabilities. It was started in 2009 with the support of Inspirasia Foundation and Pancaran Kasih Bunda. In our classroom, students have many opportunities to go beyond their limitations. Delivered by three professional and highly-skilled teachers, this program values each child's ability, and needs while also taking family's concerns seriously. Since its implementation, we have started to build relationships with the families and work closely with them in developing an Individual Educational Plan (IEP) for each child.

EDUCATION PROGRAM IN 2022

Students and Classes

18 new students were welcomed into YPK's Education Program this year. In total, 120 active students attended the program and 11,009 teaching sessions taught.

Level	Number of students in each group		
	Male	Female	Total
Cempaka (basic level)	45	42	87
Mawar (medium level)	20	10	30
Melati (advanced level)	0	3	3
TOTAL	65	55	120

Key Focus in Life Skills Subjects

- 1** Personal care/health
- 2** Communication and literacy
- 3** Daily living skills
- 4** Numeracy

EDUCATION IMPACT

71

Students enjoy socialising with other people and making new friends. They've become more confident.

76

Students are able to work in a group environment. They've improved their social skills.

98

Students can interact with family members at home other than their father and mother. They've become part of the family.

106

Students can share their experiences during the day. They improve their communication skills.

81

Parents feel calmer, safer, and happier because their child is braver.

YPK IS MY PLAYGROUND

Attending the education program for four years, Ita has transformed into a braver and more cheerful girl. She used to cry and refuse all learning activities that had been tailored for her. YPK was her first playground to play, learn, and explore things in.

Ita now enjoys reading books because her literacy has improved as well as her ability to write down her feelings or things she likes. Her communication is amazing, along with her confidence to ask the teachers when she does not understand the lesson. Everyone who meets Ita at YPK would be inspired by her enthusiasm in learning and overcoming her physical challenges. Her smiles and spirit are contagious.

Jessica Sander

It is a very fulfilling experience to volunteer at YPK Bali. I use dance as a universal language that transcends culture, age, and gender. Witnessing the student's growth, self expression and confidence in my classes is extremely heart warming. There is a sense of family @YPK Bali that I love being a part of.

Testimonials from our volunteers

Daria Kozhukhar

I volunteer at YPK to bring yoga practice to children of all abilities. It's been a true joy to see them smile every time I arrive and try their best in our practice. It's a pleasure to be a part of the team and support the mission along the way.

Gusti Ngurah Padang Kerta

YPK has always been my second home and I believe that it is home for all the students in the education program. It is safe, bringing a great deal of joy and countless opportunities to learn and practice. I wish YPK amazing successes, especially those teachers who put their heart into every lesson and activity in the classroom

Volunteers play significant roles in supporting us to develop and deliver all meaningful learning activities.

MOBILE CLINIC

The Mobile Clinic Program started in 2010 to help people with physical disabilities that could not attend our rehabilitation center in Denpasar, Bali.

During its day-to-day activities, an operational minibus takes an experienced team to different villages in remote areas in Bali. During each visitation, they not only do physiotherapy, but they also educate and promote community awareness on various aspects of disabilities and home treatments.

2022 Mobile Clinic Outreach

6
villages were supported

- Stepping Stones, Singaraja
- Desa Selumbung, Karangasem
- PUTERA Desa Salam Kasih, Tabanan
- East Bali Poverty Project, Karangasem
- Desa Kintamani, Bangli
- Yayasan Bumi Sehat, Gianyar

Program in Numbers

Program Challenges:

It takes a village to build an engaged community so they are equipped to participate with the program activities from the beginning and in the future. To work on this community engagement, YPK team has been collaborating with local NGOs to empower communities to promote active participation and increase their sense of belonging to the community center.

Partner

2 COMMUNITY CENTRES IN 2022

Two Putera Desa were launched this year through our strong partnership with local communities, NGOs and donors.

The first centre is located at Sanggulan Village -Tabanan Regency in collaboration with Forum Bhinneka Tunggal Ika. Since its launch in April 2022, the first Putera Desa has supported 19 new clients.

The second Putera Desa was opened in July 2022. This centre was developed through funding support from the Australian Volunteer Program and has been implemented in collaboration with Bumi Sehat Foundation which is based in Gianyar Regency.

To support the sustainability of these centres, training has been provided to local volunteers who have committed and are willing to help an underserved community. In total, 25 local volunteers have been involved to run the centre and 5 sessions of training were delivered to increase their capacity in supporting people with physical disabilities.

PUSAT TERAPI DESA

Pusat Terapi Desa or Putera Desa is a community-based disability centre that was piloted to scale up the impact of YPK services as well as an effort to implement the community-based rehabilitation approach and promote social inclusion.

MOBILE IMPACT

86 Families are able to make therapeutic tools using materials that are found around them, to support the exercise and independence of family members with disabilities.

"I'm grateful for the support from YPK Bali. Now, I don't need to rent a car to take my child to the city for one therapy session. It is a big relief from a financial standpoint. Therapy is now available and accessible in my village and I know what to do to help my child at home" - anonymous testimony.

79 People with physical disabilities have improved their body function to support their daily activities and be part of the community.

"Thank you YPK Bali for being very helpful. My child has been transformed into a brave child and has more confidence to do social interactions. My child now has friends" - anonymous testimony.

56 Families know what to do and how to provide the right support at home to prevent a secondary disability, which leads to a sustainable support system.

"I am very satisfied with the support from YPK and the results of the services. My child is getting better and stronger. Now my child can crawl and is practicing to stand up by holding on to a wall or table" - anonymous testimony.

LIFE CHANGING STORIES

WALKING

Komang was born with down syndrome. Due to his family circumstance, Komang never received any support or treatment to help him catch up on all his growth and development milestones. Through our partnership with Stepping Stones Foundation, Komang, who lives in the northern part of Bali, can now access our services every Monday. His parents are very supportive and are diligently stimulating Komang at home to improve his mobility and functions. Now two years old, Komang can walk. He loves to play and he is unstoppable.

BACK TO SCHOOL

Krisna (16 years old) was in a coma for a month after a tragic motorbike accident. When he recovered from his prolonged loss of consciousness, he realized that his right hand and left leg had weakened. His room at home was the only place he knew since his hospital discharge. He had no friends and spent his time just lying on his bed.

Then in September of 2022 Krisna joined our Mobile Clinic. During our first physical assessment and interview, we could tell that Krisna had the motivation to get his life back. He then undertook all the exercises through the supervision of his parents. Within three months, Krisna was back to school. His mobility had improved and his confidence to meet friends and teachers increased. This brought hope, not just for Krisna to continue his education, but also for his parents to see their son achieve a brighter future.

TESTIMONIAL

After already working together for several years, we could happily intensify that in 2022. With our focus from Stepping Stones Bali on early detection in the fieldwork projects, we come across many children/ patients who need physiotherapy care in the rural areas in the north of Bali. We are very happy that YPK's mobile clinic came to us on a weekly basis and was able to provide appropriate care for all those patients there. A part of this group had a great progress in this year and we hope to continue this for many more patients.

Marjanne Oomen - Founder of Stepping Stones Bali

BALIRUNGU HEARING IMPAIRMENT

The BaliRungu program provides support to the disadvantaged community in the field of hearing impairment and risk of hearing loss. We are very aware that once someone has an impairment in their hearing, they tend to be stigmatized and isolated.

It is our objective to identify people who are deaf or at risk of developing hearing loss in an early stage and provide related support and communication development services to families.

A New Launch of Collaborative Hearing Project

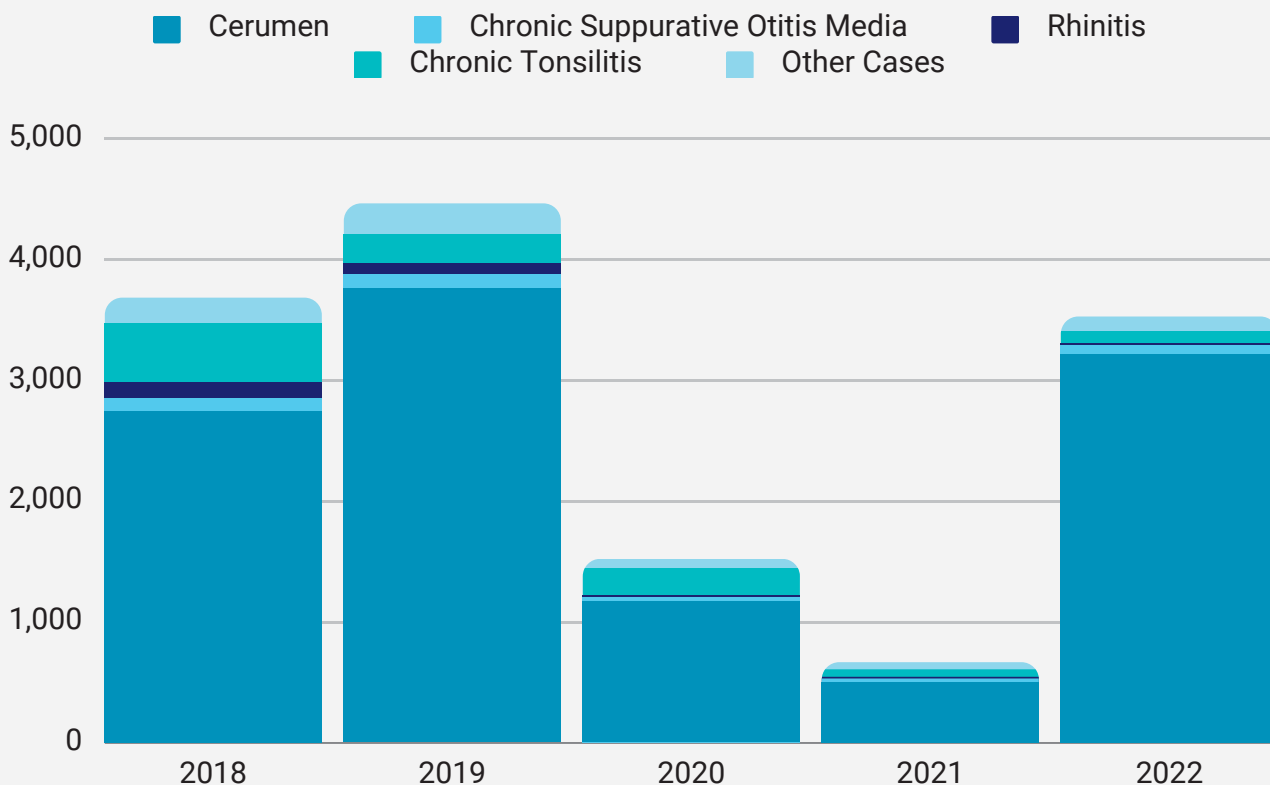

RUMAH BANTU DENGAR

Rumah Bantu Dengar (RBD) or Community Hearing Center is an initiative that aims to promote early detection and intervention of hearing loss. It was developed through funding support from the Australian Aid – the Direct Aid Program and supported by the Government of Denpasar Municipality by providing space and operational cost (water and electricity).

Located at the Denpasar Disability Service Center, RBD was launched in July 2022. Since its inception, this centre was helped **530** people to access quality hearing tests and medical treatment. We're also thrilled to work with **3** doctor volunteers in delivering the service. Now, this centre is open twice a week and an appointment is required.

CASE REPORT

Over the past five years, the YPK Bali team reached 252 locations across Bali that had been flagged as having no access to Ear, Nose and Throat (ENT) services.

We examined 38,289 people and 26,581 were children. Through these examinations, we were able to flag 10,222 children who had developed cerumen (ear wax). Identification is essential for treatment from the ENT specialist doctor, so that they can have clean ear canals allowing them to hear better and prevent them from developing ear infections and damage that can cause deafness.

PARTNERS

Achievement of BaliRungu

2867

Children were treated and prevented from cerumen impaction which can lead to hearing loss.

10

Local medical officers were trained to do basic screening of ear/hearing problem.

583

Babies and toddlers were provided with early detection of hearing problem.

14

People with hearing loss received hearing aid to support their life at school and work.

8,005

PEOPLE IN BALI HAVE BENEFITTED FROM THE
BALIRUNGU HEARING IMPAIRMENT PROGRAM
IN 2022.

DONI

Doni, one of our beneficiaries in the hearing impairment program, lived at an orphanage called Yappenatim located in Gianyar Regency. Our team went there with our volunteer doctor, Dr. Endha Narendra, Sp. ENT-KL, on a mission to provide quality health services for those unfortunate children.

Under the examination by Dr. Endha Narendra, Sp. ENT-KL, it was identified that cotton buds had been left in Doni's left ear. After confirming this directly with Doni we found out that the cotton buds had been left behind for a year, after he had cleaned his ears. Doni suspected that he would need an operation to remove the cotton, so he did not dare to tell anyone about it. But he started to feel a change in his hearing especially when he was in the classroom. Doni was just too afraid to seek help.

After receiving treatment from our team, Doni was very relieved. The cotton had been successfully removed from his ear in a safe and comfortable manner. Not only that, Doni's hearing now functions optimally for communication both at home and at school. Doni has promised us and his caregivers that he will take care of his ears more carefully from now on.

HOW YOUR GIVING HELPS

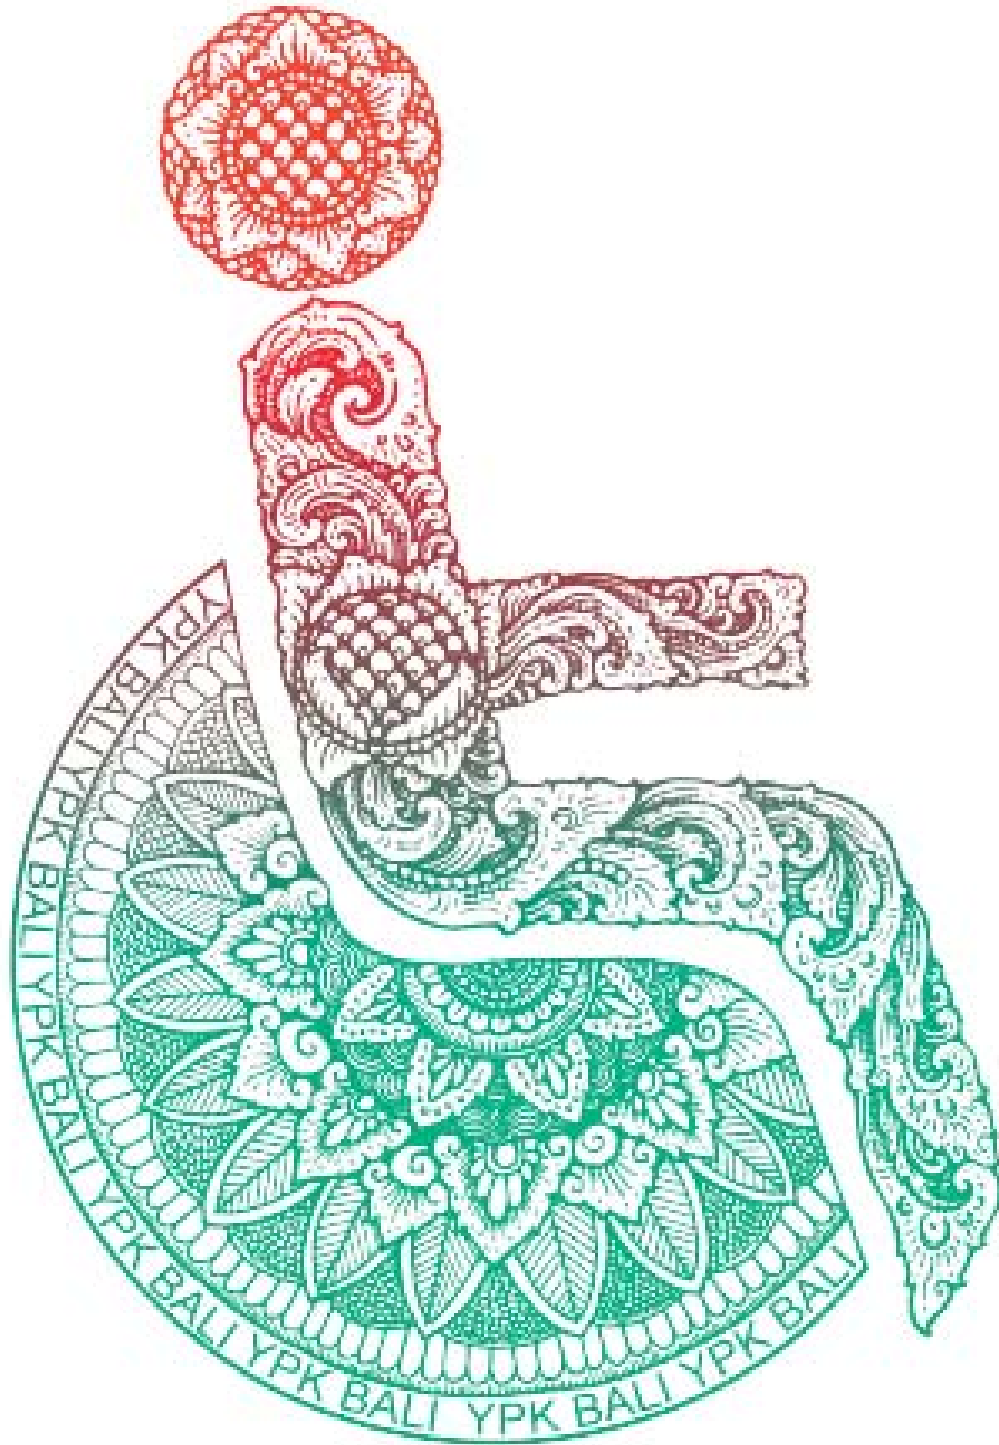

Thank You

YPK Bali partnered with Inspirasia Foundation in 2010. This partnership has allowed us to jointly increase and expand our impact on society. Inspirasia Foundation is a major donor, but they are more than just that to us. Every year they have encouraged us to grow and strengthen our capacity through their more than money support. We are very honored to be able to continue receiving support and working hand-in-hand with Inspirasia Foundation. Thank You **Inspirasia Foundation!**

YPK Bali wouldn't exist without our supporters. Everything we do is made possible because of their generosity, enthusiasm, and dedication. We acknowledge and express our gratitude to all those who have supported us. Whether it is in-kind donations, philanthropic support, volunteering or corporate partnerships, it is all vital and allows us to create sustainable impact in the community.
